REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: All pending claims 1-10, 15-19, and 21-25 have been carefully considered by the examiner.

The present invention is directed towards a performance control application program for configuring performance criteria, such as processor clock rate, fan speed, and disk usage, during operation of a specific application program.

Independent claim 1 recites the limitation "a performance control application program with a graphical user interface, the graphical user interface comprising at least one application program selector associated with an application program loaded in the processor-based system, wherein the application program selector is adjustable between a second minimum setting and a second maximum setting; wherein the at least one application program selector enables a user to modify the one or more performance criteria during operation of the application program". While the cited prior art reference, Cline et al. (US 5550970), discloses a user interface that comprises an application program selector for adjusting between a minimum and maximum setting, they fail to disclose allowing the user to modify one or more performance criteria. Cline invention is directed towards allocating the amount of RAM usage for each application running on the system, however, the claim recites that performance criteria includes, processor clock rate, fan speed, and disk usage. Cline fails to teach modifying clock rate, fan speed, or disk usage.

A detailed search of the prior art was performed and no significant sources were located that teach or suggest the above cited limitation of claim 1. Therefore claim 1, and all dependent claims 2-10 are allowable over the prior art.

Independent claims 21 and 24 recite similar features, as discussed in independent claim 1, and is allowable over the prior art for the same reasons. Claims 22, 23, and 25 depend from allowable independent claims 21 and 24.

Independent claim 17 is allowable over the prior art because no teaching or motivation could be found in the art that discloses controlling both the processor clock rate and the fan speed simultaneously with one selector.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
